

**Job Title**

Software system developer  
(Medior/Senior)

**Location:** Belgium

**Duration:** Permanent contract

**Employment status:** Full time

**Start Date:** As soon as possible

**About Skyline Communications:**

Skyline Communications is the global leading supplier of end-to-end multi-vendor network management and OSS solutions for the broadcast, satellite, cable, telco and mobile industry. Our flagship DataMiner® network management platform, which has received various prestigious awards, enables end-to-end integration of the most complex technical ecosystems and has been deployed by leading operators around the world.

**Job description:**

To submit an application, please visit the [Areeba Jobs](#) platform and search for this vacancy. This job opportunity is part of the [MATCH](#) project.

As a Software System Developer, you will be joining a squad of talented engineers who work with cutting-edge software technology in an agile environment.

The software they develop interacts with thousands of different systems and is deployed by leading broadcast and telecom companies around the world.

Every day, you will have the opportunity to use pioneering technologies and be involved in implementing advanced solutions with a global impact.

You will literally be building links between users and products, with the objective to orchestrate complex technological ecosystems more easily and intuitively than ever before.

## Main tasks:

- > develop back-end applications for high-performance system integrations
- > develop front-end visuals for specific system integrations
- > work together with squad members to analyze client needs and provide first-class solutions,
- prioritizing customers' requirements
- > become a specialist in one or more products or in a particular technology domain,
- depending on your personal interests and capabilities
- > grow as a technological expert and share your knowledge by coaching, training and teaching
- > Apply Agile practices and benefit from its iterative approach
- by striving towards Minimum Viable Products (MVP)

## Qualifications:

- > master or doctorate degree in ICT, Software and/or Telecom
- > very good proven knowledge of C# and .Net Framework (proficiency should be mentioned in your cv)
- **5 years of relevant work experience**
- > experience with markup language (e.g. XML)
- > knowledge of communication protocols in general, such as SNMP, HTTP or serial
- > knowledge of TCP/IP networking, multithreading, Web Services (REST, SOAP) and JSON
- > knowledge of databasing (e.g. MySQL, Apache Cassandra) and Microsoft Visio
- > proven knowledge of the telecom and broadcast industry is required (e.g. HFC broadband, IPTV, broadcast, cable, satellite systems, ...)
- > good verbal and written communication skills in English
- > you are a creative, fast learner with a great passion for software product integration
- > you are eager to understand how complex devices and systems operate in telecom and broadcast industries, among others
- > you have an eye for detail with the ability to capture all corner cases and to deliver high-quality results
- > you can adapt very quickly and enjoy digging beneath the surface to understand how things work
