

**Job Title**

Drug product formulation scientist

**Location:** Belgium**Duration:** Permanent**Employment status:** Full time**Start Date:** As soon as possible**About Ardena:**

Ardena is your one-source partner to help you navigate the drug development process from molecule to clinic. We offer an integrated, flexible service encompassing drug substance production, dosage form manufacture, clinical logistics, bioanalysis and dossier development.

**Job description:**

To submit an application, please visit the [Areeba Jobs](#) platform and search for this vacancy. This job opportunity is part of the [MATCH](#) project.

The Formulation Scientist is responsible for drug product formulation development projects for new chemical entities in support of (pre)clinical studies and stability studies. Formulations can be either granules, capsules, tablets, solutions, etc. Main tasks include project preparation, execution and reporting. The Formulation Scientist is also responsible for process optimisation & upscaling and he/she will ultimately transfer the developed products to the GMP production area. You work closely together with the Lab Operators and you align with Project Management.

## Main tasks:

- Providing technical expertise/scientific input on formulation development strategies
- Preparation and practical execution of formulation development projects
- Providing scientific expertise and formulation insights to Core Teams meetings
- Assisting to client meetings to present scientific data in a clear manner
- Writing scientific reports for clients, e.g. formulation development reports
- Drafting work instructions for the Formulation Lab Operators to ensure that work is performed efficiently and in a scientifically sound manner
- Monitoring experiments (e.g. process development, implementation of new formulation techniques) and ensuring complex data are interpreted in a scientifically correct way
- Identifying potential stability and performance issues with prototype formulations
- Streamlining the activities associated with a wide variety of formulation technologies to shorten Formulation Lab turnaround times and improve the quality of formulations being delivered
- Supporting the scale-up of developed formulations and bringing them to GMP manufacturing

## Qualifications:

- PhD level education in the field of pharmaceutical technology or equivalent expertise; preferable expertise with multiple formulation forms
- Having a degree as Msc. Pharmaceutical Sciences is an asset
- Flexibility to work in both an R&D and GMP environment
- Excellent oral and written communication skills in English
- Self-motivated and able to adapt to changing environment with ease
- Work independently or as part of a team, able to stimulate other co-workers
- Able to deliver results within limited time and budget; solution-oriented
